Last Updated: January 11, 2026

Scope

Iteration-level tracking for the *File and Directory Operations* workcard.

Detailed explanations, demos, and learning artifacts are maintained separately in versioned artifact files.

Iteration Log

v1.0 — Basic File & Directory Manipulation

Status: Completed

- Target: Safe manipulation of files and directories on remote Linux systems
- Capability: Creating, copying, moving, inspecting, and deleting files
- Outcome: Confident control over application and system files

v1.1 — Safe & Efficient Operations

Status: Planned

- Target: Reduce risk during bulk file operations
 - Capability: Wildcards, verification before destructive actions
 - Outcome: Predictable and safe file management at scale
-

Next Iteration

v1.1: Safe and efficient bulk file operations.

Status: Ready
